FISCAL OFFICER'S REPORT

Fiscal Officer Report
Ross A. Cockfield, Fiscal Officer
January 2018
Prepared February 2018

Financial reports as of January 31st have been distributed. With this being the first month of the year one month expenditures clearly fall within our appropriated limits. We're attempting to budget within three month cycles in order to keep expenditures under control. As such, we're creating purchase orders that represent three months of spending and charge monthly expenditures against the open purchase order.

Our reconciled cash fund balance for all funds as of January 31st is $591,196.47.

I've submitted our 2017 final report to the State and it's presented for your review. As you're aware these reports are unaudited. Of note is the addition of a "Permanent" Fund to our financial reports. This permanent fund represents an endowment (Putnam Fund Investment) made to the Library many years ago which has been carried by the Auditor in their work papers. Consequently, they required an adjustment to our financial statements as of 12/31/15 which I made at the end of 2017. Since this endowment has been closed per Board resolution, I have to find out from the Auditors how to resolve the balance of $3,792 we're being required to carry on our books.

I've also included the financial review prepared by Kevin Penn, CPA for the 4th quarter of 2017. It's also available for your review.

I've completed my evaluation of fund accounting systems to replace the I-JAN. Due to the UAN's inability to track and report program revenues and costs, I'm recommending the Blackbaud Financial Edge NXT System for your approval. The system is a high level cloud based system which will afford us the ability to track and report any and all programs, grants, or activities for the current calendar year as well as across calendar years. The system has a number of features that will streamline paper flows thereby saving valuable time and eliminating the need for pushing unnecessary paper. Email notifications drive the requisition and purchase order process and purchase approvals are matched against budgetary spending limits thereby establishing inherent spending controls within the system. The system also has a "dash board" feature which can be made available to the Board with preset graphs or reports to give an as-desired financial picture of programs or overall financial position. The Director and all of the managers have had the benefit of a demonstration and believe it would improve our internet flows. The system requires a three year financial commitment and is slightly more (approximately $600) than our annual payments for the IJAN - $7,100 vs $6,500. If the Board
approves going forward, I'm recommending a monthly payment amount of $986 for 36 months in lieu of a more significant cost upfront setup cost and annual payments. I'm targeting a complete transition by June 30th. The resolution is before the Board for approval.

Lastly, I'm recommending that the Board give strong consideration to putting a levy before the voters this year. Over the last two years we've changed our medical insurance, made a shift from full time staff to a greater utilization of part time employees, and reduced security costs along with making other significant thought less noticeable cost cutting measures all the while trying to improve the facility and maintain a high level of service. Consequently, there is very little fat in our operations and any further cuts to operations would negatively affect the quality of public service. Unfortunately, costs continue to raise revenue is falling and the unexpected is just around the corner. I estimate that one mill will generate approximately $112,000 annually and suggest that we consider an additional 1.5 to 2 mills which would generate between $168,000 and $224,000 in additional annual revenue. These additional dollars can be effectively targeted to support expanded services in other parts of the city, improve outreach to needed public segments or be maintained to replenish our reserves. Other systems have indicated that they will also be placing levies before their voters this year.

Mr. Fambrough asked if there are issues with the UAN system.

Mr. Cockfield replied that Ms. Turner wanted to establish program reports. The UAN system does not allow for this.

Mr. Rashid asked if this system is hacked, who is responsible.

Mr. Cockfield stated that he could find out.

Mr. Mays asked if the Finance Committee had a chance to review this new system.

Mr. Cockfield replied that the Finance committee received hardcopy handouts. He also went on to say that the UAN system does what we need it to do today, but it will not meet our needs in the future.

Ms. McClarin commented that we are looking to raise funds and we will have to be able to generate quick and accurate reports in the future.
